Commercial Buildings and Healthcare Facilities

The perfect solution to help protect a commercial building from significant water damage due to leaks or sudden plumbing failure.

The WaterCop® Pro Commercial is an automatic water shut-off system that is perfect for a facility left unattended at night and on weekends. It's the kind of protection that can help avoid shutdowns during restorations and repairs. There is also the reduced threat of costly relocation expenses, insurance claims and employee health issues due to mold.

Features

- Provides peace-of-mind with 24/7 year-around protection
- Ideal for commercial office buildings, hospitals, clinics, dentist and doctor offices, beauty salons and restaurants
- Designed for spaces containing chill-water, water heaters, kitchenettes, breakroom pantries, and bathrooms
- Place system at any water source to reduce the health threat of mold caused by hidden leaks
- Helps avoid costly building shut-downs due to water damage repairs
- Proven effective with hundreds of thousands of time-tested and proven systems working flawlessly in the field
- On average, the system has a life expectancy of 20+ years
- Simple tie-in with any security or building automation system or SmartConnect WiFi device

The proven leader in household leak protection:

is there when you're not.

The WaterCop® family of leak detection and Automatic Water Shut-Off Systems help protect commercial buildings from significant damage due to leaking or sudden plumbing failure.

WaterCop Pro

The next generation WaterCop System. Pro adds valuable features like addressable sensors, an improved user interface, and flexible installation options.

- Available in indoor, dual or outdoor system configurations
- Up to 45 addressable wireless sensors and 8 hard-wired sensors
- 2 dry contact outputs to security systems
- RJ45 integration
- On-board relay terminal
- Control panel displays sensor numbers and conditions
- Up to 4" valves available (up to 12" by request)
- Audible alarm
- Pressure, rope and leak sensors
- Multisense hub with temperature sensor included

WaterCop Leak Stop+

Leak Stop+ detects plumbing leaks at a single location and automatically shuts off the water supply. They are ideal solutions for water heaters, recirculation pumps and softeners.

- Includes two hard-wired sensor probes
- RJ45 integration
- Audible alarm
- Live or dry contact signals for third-party integration and SmartConnect

WaterCop Classic

The first generation basic leak detection and automatic shut-off system.

- Available in indoor, dual, or outdoor system configurations
- Unlimited non-addressable wireless sensors
- RJ45 integration
- Audible alarm for sensors
- Up to 2" valves available
- Available with 1 or 2 hard-wired sensors
- Pressure and low-temperature sensors

Automated PVC Shut-Off Valves

Water leak detection and automatic shut-off designed for PVC plumbing systems commonly found in new construction, irrigation and agriculture.

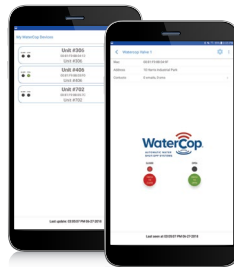

- Up to 2" valves available

SmartConnect

Receive mobile alerts and control your WaterCop system using the WaterCop app on a phone or tablet. SmartConnect is compatible with Classic, Pro and Leak Stop+ systems.

- 24/7 remote mobile control and access to your WaterCop system
- WiFi compatible
- Mobile alerts about power outages

WaterCop Large Valve

With the WaterCop Large Valve configuration, you get the perfect solution for larger water supply lines commonly found in commercial buildings and larger residential homes.

Lead Free NSF/ANSI 372 refers to the wetted surface of pipe, fitting and fixtures in potable water systems that have a weighted average lead content $\leq 0.25\%$. Source: California Health & Safety Code (116875); Vermont Act 193.
