

Introducing WaterCop SmartConnect

The smart way to get remote mobile control and access to your WaterCop automatic shut-off system.

It's 24/7 leak monitoring, no matter where you are.

Even when you're away from your residential or commercial property, SmartConnect is always there to provide you with around-the-clock mobile connection and access to your WaterCop Automatic Water Shut-Off System.

SmartConnect works through our new app that easily installs onto your smart phone or tablet. The only other thing you need is an internet connection and then you can have real-time remote notification of valve system status.

REMOTE WATER CONTROL

MOBILE APPS

WI-FI COMPATIBLE

NOTIFICATION ALERTS

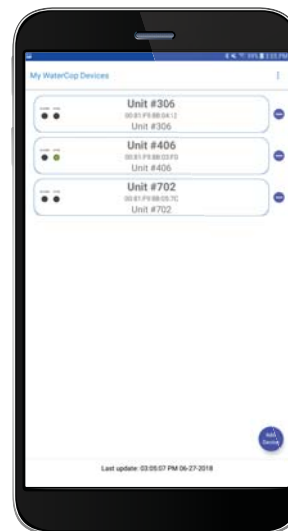

DIRECT ETHERNET

Here's why SmartConnect is such a smart solution:

- 24/7 remote mobile control and access to your WaterCop system
- Mobile alerts about automatic closure and power outages
- Wi-Fi compatible
- Works with most WaterCop systems
- Ideal for residential or commercial properties

With SmartConnect, you get 24/7 remote mobile access and control of your WaterCop Automatic Shut-Off System.

Specifications/system requirements:

- Smart phone or tablet: Android 5.0 or higher iOS 10.3 or higher SIM card or Wi-Fi connectivity
- 2.4 GHZ router with protected Wi-Fi (with password)
- Bluetooth 4.1 or higher
- Interconnect Cable Included

Note: WCACT1, WPMS and WPMSH require the ACA100 power supply (sold separately).
