WaterCop Z-Wave with SmartThings New App

How to add the WaterCop Actuator: * programming must be within 10' of the Hub
1) Set up the account, Hub and app per the SmartThings Instructions.
2) Power the actuator. If previously powered, unplug and plug back in to initiate 'Inclusion Mode' for next steps.
3) While on the Home page of the app click '+'.
4) Click 'Add device' from the pop out box.
5) Select FortrezZ from the 'All Brands' options below.
6) Select 'Valve' and follow the on-screen instructions to add and assign a location to your devices.
7) 'Successfully connected' will appear on the app.
8) Click the box to customize the name, especially if you have multiple properties.
9) When finished naming, click 'Done'.

How to add WaterCop Leak Sensors: * programming must be within 10' of the Hub
1) Set up the account, Hub and app per the SmartThings Instructions.
2) Power the sensors using the included AA batteries.
3) While on the Home page of the app click '+'.
4) Click 'Add device' from the pop out box.
5) Select FortrezZ from the 'All Brands' options below.
6) Select 'Water leak sensor' and follow the on-screen instructions to add and assign a location to your sensors so you know where to find a leak.
7) 'Successfully connected' will appear on the app.
8) Click the box to customize the name.
9) When finished naming, click 'Done'.

How to Automate the Sensors and Valve (so wet sensors automatically trigger the valve closed):
1) After the valve and sensors are added you need to set an automation so when sensors detect a leak, they trigger the valve closed.
2) Click '+' on the Home screen.
3) Select 'Add automation' from the pop out box.
4) Select 'Smart Home Monitor'.
5) Click 'Set up' on the Leaks option.
6) Make sure the blue toggle is on for 'All sensors'.
7) Click 'Next' – Click 'Valves Closed'
8) Select the valve/s you need to close.
9) Click 'Done'.
10) Click 'Done' again.

How to exclude (delete) devices: * programming must be within 10' of the Hub
1) Click the Menu icon on the top left (3 horizontal lines).
2) Click 'Devices'.
3) Click the 3 dots on the top right.
4) Click 'Edit'.
5) Select 'FortrezZ Moisture Sensor' or whatever you named the sensor.
6) Select 'Delete device'.
7) Confirm delete.
8) Press the button on the sensor or MODE on the actuator momentarily, and you'll see them get removed on the app.
9) Click 'Done'.
10) Click 'Done' again to exit edit.
