Leak Detection & Automatic Water Shut-Off

Water Softening & Treatment

Grow Your Sales

Some of our most successful Installing Dealers are water treatment companies. **Nearly 30% of property owners in North America have experienced major water damage** caused by leaking appliances or broken pipes. WaterCop® Leak-Detection and Automatic Water Shut-Off Systems reduce the risk of catastrophic water damage giving property owners peace of mind and avoiding costly insurance claims.

Reduce Your Risk

Even the best water filtration systems have the potential to leak over time. Minimize the risk of liability from damages to your customers' property by installing a companion auto shut-off system. The WaterCop® Automatic Water Shut-Off System is designed to protect homes and businesses from catastrophic flooding due to leaky, aged, or faulty water appliances or fixtures such as softening and filtration equipment.

Installing WaterCop® Automatic Water Shut-Off Systems is a source of new sales for you and a reduction in leaks for your customers.

The proven leader in household leak protection:

is there when you're not.

The WaterCop® family of leak detection and Automatic Water Shut-Off Systems help protect properties from significant damage due to leaking or sudden plumbing failure.

WaterCop Pro

The next generation WaterCop System. Pro adds valuable features like addressable sensors, an improved user interface, and flexible installation options.

- Available in indoor, dual or outdoor system configurations
- Up to 99 addressable wireless sensors and 8 hard-wired sensors
- 2 dry contact outputs to security systems
- RJ45 integration
- On-board relay terminal
- Control panel displays sensor numbers and conditions
- Up to 4" valves available (up to 12" by request)
- Audible alarm
- Pressure, rope and leak sensors
- Sensor hub with or without low ambient temperature sensing

WaterCop Leak Stop+

Leak Stop+ detects plumbing leaks at a single location and automatically shuts off the water supply. They are ideal solutions for water heaters, recirculation pumps and softeners.

- Includes two hard-wired sensor probes
- RJ45 integration
- Audible alarm
- Live or dry contact signals for third-party integration and SmartConnect
- Available with 1 or 2 rope sensors

Automated PVC Shut-Off Valves

Water leak detection and automatic shut-off designed for PVC plumbing systems commonly found in new construction, irrigation and agriculture.

- Up to 2" valves available

WaterCop Classic

The first generation basic leak detection and automatic shut-off system.

- Available in indoor, dual, or outdoor system configurations
- Unlimited non-addressable wireless sensors
- RJ45 integration
- Audible alarm for sensors
- Up to 2" valves available
- Available with 1 or 2 hard-wired sensors
- High pressure sensors

WaterCop Large Valve

With the WaterCop Large Valve configuration, you get the perfect solution for larger water supply lines commonly found in commercial buildings and larger residential homes.

SmartConnect

Receive mobile alerts and control your WaterCop system using the WaterCop app on a phone or tablet. SmartConnect is compatible with Classic, Pro and Leak Stop+ systems.

- 24/7 remote mobile control and access to your WaterCop system
- WiFi compatible

Lead Free NSF/ANSI 372 refers to the wetted surface of pipe, fitting and fixtures in potable water systems that have a weighted average lead content $\leq 0.25\%$. Source: California Health & Safety Code (116875); Vermont Act 193.
