

The proven leader in household leak protection:
WaterCop® is there when you're not.

Check with Your Insurance Provider for Discounts

Ask your insurance provider if they offer
a discount for installing a WaterCop leak detection
and water shut-off system.

More and more insurance providers now offer discounts for installing a leak-detection and automatic water shut-off system. Policies differ from one provider to another, but it is commonly required that the system actively monitor for leaks and automatically shut off the water to the whole house in the event a leak is detected. WaterCop not only monitors and stops leaks, it sends a notice to your phone, tablet, or security system.

Insurance companies offering premiums or
other discounts include the following providers.

Preventable water damage is the
#1 cause for home
insurance claims.

Water damage costs home insurers
\$13 billion
a year.

The average claim is **\$10,000**.

1 in 50 homes
has water damage from a plumbing
system failure each year.

25% of all
homes
will experience preventable
water damage.
