

The **Proven Leader** in Leak Detection and Automatic Water Shut-off

WaterCop doesn't just send an alert when a leak is detected, **it shuts off the water supply to the leak.**

Washing machine hoses split

Ice-makers and water treatment connections to fixtures fail

Dishwashers and toilets leak

WaterCop® helps protect
your home **24 hours**
a day, home or away.

Preventable water damage is the

#1 cause of
insurance claims

Approximately

25% of
homeowners

have experienced water damage

According to national insurance data

94% of plumbing
leaks

occur in high-risk plumbing locations
where WaterCop sensors can be placed

Be sure to check with your insurance
provider for available discounts when
you install a WaterCop system.

How does a WaterCop system work?

The WaterCop system utilizes an automatic shut-off valve installed on the water supply line of a home or commercial building. When sensors, installed in high-risk plumbing locations, detect a leak, a signal is instantly sent to the automatic shut-off valve to close the main water line. Water flow is quickly stopped to downstream areas of your home or building, reducing the chance of major flooding.

WaterCop systems easily integrate with security and home automation systems.

The first generation basic leak detection and automatic shut-off system.

- Available in indoor, dual, or outdoor system configurations
 - Unlimited non-addressable wireless sensors
 - RJ45 integration
 - Audible alarm for sensors
 - Up to 2" valves available
 - Available with 1 or 2 hard-wired sensors and high pressure sensor
-

The next generation WaterCop System. Pro adds valuable features like addressable sensors, an improved user interface, and flexible installation options.

- | | |
|--|--|
| • Available in indoor, dual or outdoor system configurations | • RJ45 integration |
| • Up to 99 addressable wireless sensors and 8 hard-wired sensors | • On-board relay terminal |
| • 2 dry contact outputs to security systems | • Control panel displays sensor numbers and conditions |
| • Ambient low temperature sensors | • Up to 4" valves available (up to 12" by request) |
| | • Audible alarm |
| | • High pressure and rope sensors |

Receive mobile alerts and control your WaterCop system using the WaterCop app on a phone or tablet. SmartConnect is compatible with Classic, Pro and Leak Stop+ systems.

- 24/7 remote mobile control and access to your WaterCop system
- Wi-Fi or Ethernet compatible

Leak Stop+ detects plumbing leaks at a single location and automatically shuts off the water supply. They are ideal solutions for water heaters, recirculation pumps and softeners.

- Includes two hard-wired sensor probes or 1 or 2 rope sensors
- RJ45 integration
- Audible alarm
- Live or dry contact signals for third-party integration

Water leak detection and automatic shut-off designed for PVC plumbing systems commonly found in new construction, irrigation and agriculture.

- Available for Classic or Pro
- Available in indoor and outdoor configurations
- Can be mounted in any position or orientation
- Up to 2" valves available
